CORE VALUES & DIFFERENTIATOR

- Agile, data analytics, and compliance are in our DNA. ***One of our complex software projects has recently made it to the US Congress due to our unique agile execution approach*** that uses best practices, tools, techniques, automation, and compliance (section 508/security).

- Our Teams members are highly technical, skilled, & motivated individuals possess top industry certifications such as PMP, PMI-ACP, Java, Security+, AWS Cloud and DevOps,SAFe Program Consultants (SPC4), Machine Learning, CSM, (ML), Microsoft, ITIL, data management, Blockchain, etc.

- We are great at continuous attention to technical excellence using XP, SCRUM, TDD, KANBAN, Pair Programming, etc.

- Our employees ensure increased flexibility and scalability in every solution

- We focus on **Built-in-Quality** by automating various manual processes resulting almost **No Technical debt** for the agency and saving money on O&M contract– e.g. The Library of Congress', www.copyright.gov/vcc

- 95% Staff holds US Government clearances

- We form mature cross-functional agile teams and empower them using our unique project management process and Agile-training before deploying them on a project.

- Our each staff member knows how to:

  - Maintain greater **visibility & transparency** into project communication, performance, risks, dependencies, blockers, etc. using **Dynamic Dashboards & Reports** throughout the project execution giving granular detail of each task and associated deliverables at any given point in time.

  - Frequently deliver usable capabilities that provide value to customers more rapidly with no surprises.

  - Gather & document functional and Non-functional requirements in Capability, Epics, Features, User Stories format throughout the project execution- directly from the business, SME, leadership who may not be technical

  - Identify any impediments & risks in advance & create mitigation plans

  - Comply with Section 508 & Security from day 1 of the execution.
